DETAILS OF EHS SOFTWARE FUNCTIONALITIES

Software with Business Sense

EHS – Part the SVIQ OpMan Suite

eBMR

- A Flexible Template-based Electronic Batch Manufacturing Process Management software
- Recording any Multi-stage Production Cycles with In-Process Observations, Activity, Readings and Quality Check Points
- Designed versatile for application in any industry vertical

EHS

- Created to digitalize all Processes in the Governance of Environment, Health and Safety Operations of any industry sector
- Covers PTW, PSSR, PSM, Incident Management, Observations and Change Management processes

AMS

- Aids creation of Scheduled and Ad-hoc Audit Plans
- Helps track Multiple Audit Calendars and carry out Audits, record and share Observations and Checklists for Confirmity and Compliance tracking

VizTrack

- Complete Visitor Management System to track both Internal and External Visitors
- Maintains Head Count at Plant comprising both employees and visitors to enable aid in emergency evacuations
- Keeps updated location-wise Emergency Response Team members' availability by tracking their entry/exit from each location

LCM – Coming Up

- Plan Labour Requirements, Award Contracts
- Manage Labour allotment to multiple sites
- Oversee Labour Attendance
- Ensure all Labour related Compliances

CMS – Coming Up

- A versatile Canteen Management System that aids accurate planning of food production across shifts aided by current attendance of employees, workers and visitors
- Enables reduction of food wastage and helps maintain sustainable canteen operations

SVIQ

Functionalities of SVIQ EHS

Complete Coverage of All Relevant Aspects

- Permit to Work (PTW)
- Process Safety Management (PSM)
- Pre-Start Safety Review (PSSR)
- Management of Change (MOC)
- Observations
- Incidents Reporting

SVIQ

Software with Business Sense

Permit to Work

The Permit to Work module ensures a structured and compliant workflow for high-risk tasks, safeguarding personnel and facilities. It enables organizations to manage work permits digitally, reducing manual errors and ensuring accountability.

Key Features

- Online Permit Request and Issuance
- Risk Assessment Integration
- Real Time Tracking
- Automated Approvals
- Customizable Templates
- Audit Trials

Software with Business Sense

Process Safety Management (PSR)

This module provides a comprehensive framework for preventing process-related incidents and ensuring operational safety. By centralizing safety management processes, organizations can proactively mitigate risks.

Key Features

- Hazard Analysis Tools
- Compliance Monitoring
- Safety Equipment Management
- Incident Investigation Integration
- Training Management
- Key Metrics Dashboards

SVIQ
Software with Business Sense

Pre-Start Safety Review (PSSR)

The Pre-Start Safety Review module ensures operational readiness before initiating new or modified processes. This proactive approach minimizes risks and enhances safety.

Key Features Include

- Customizable Checklists
- Multi-Department Collaborations
- Digital Approvals & Documentations
- Alerts & Notification
- Compliance Assurance
- Audit Ready Reporting

Pre-Startup Safety Review (PSSR)

SVIQ
Software with Business Sense

Management Of Change (MOC)

The Management of Change module provides a structured process for evaluating and implementing changes safely and efficiently. This ensures that no aspect of safety, compliance, or operations is overlooked.

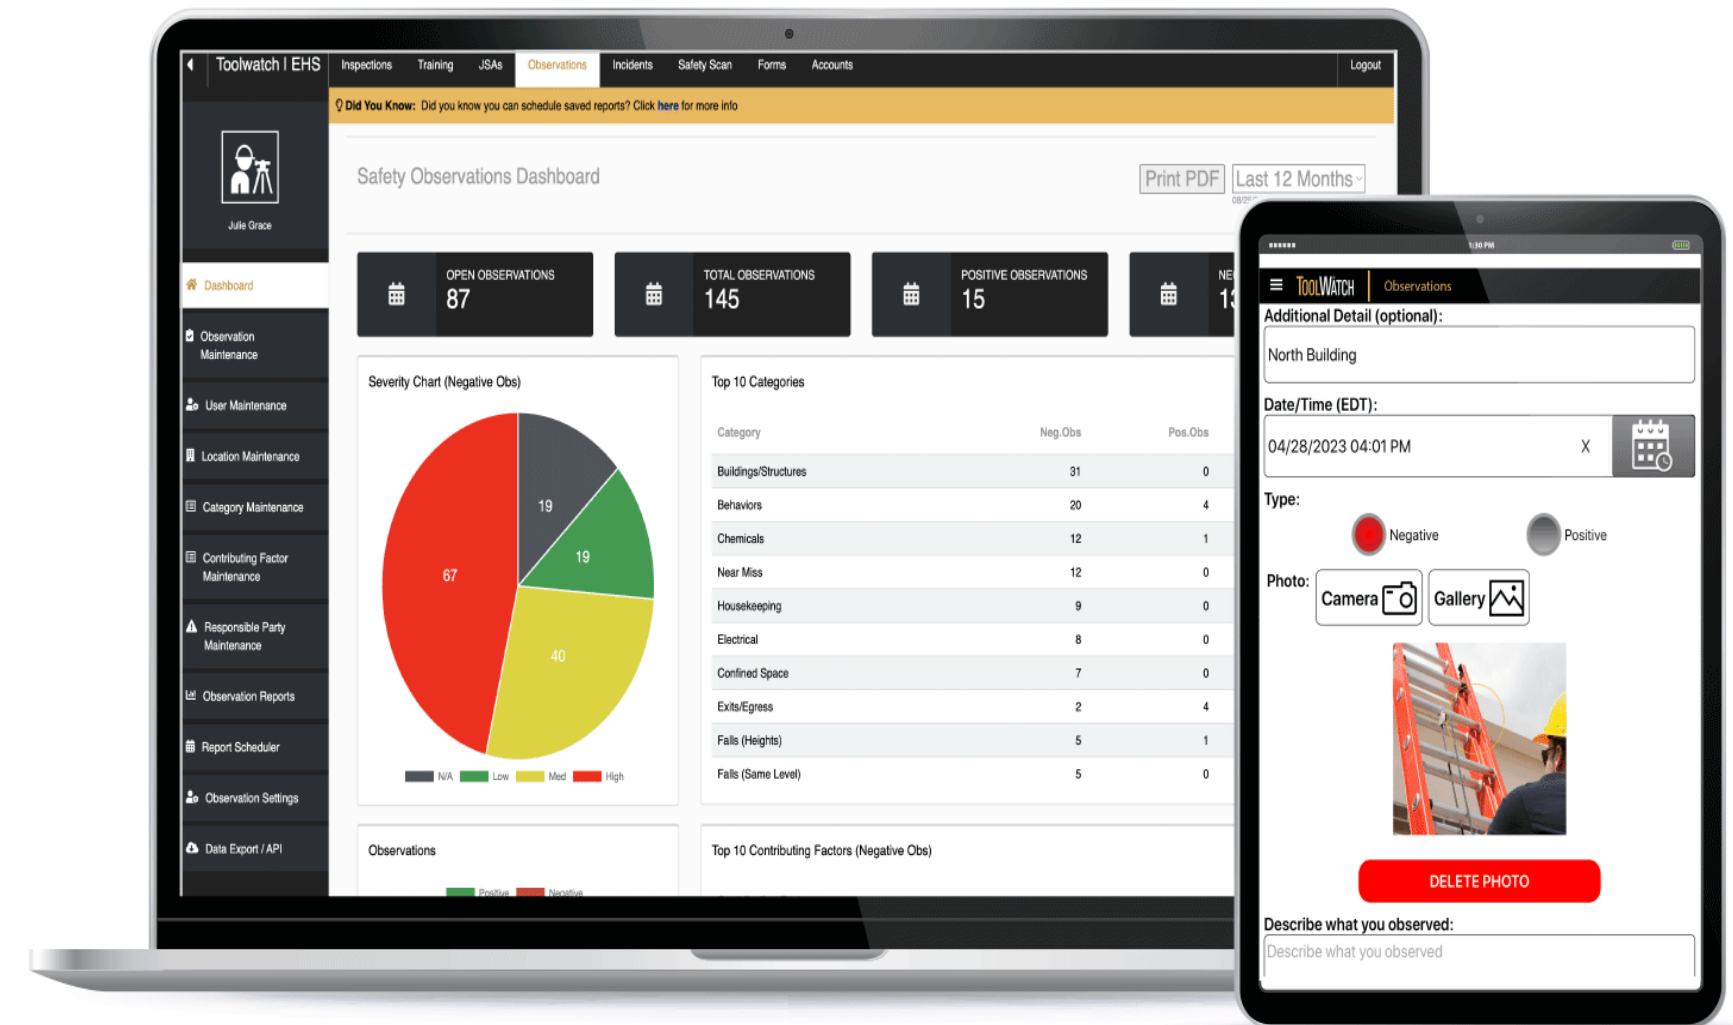

Key Features

- Change Request Workflow
- Impact Analysis Tools
- Role Based Approvals
- Historical Data Management
- Real Time Notifications
- Regulatory Compliance Integration

SVIQ
Software with Business Sense

Observations

Encourage a culture of proactive safety with a robust observation module that captures, tracks, and resolves safety concerns efficiently.

Key Features Include

- Quick Reporting
- Categorization & Prioritization
- Mobile Accessibility
- Real Time Alerts
- Analytics & Insights
- Action Tracking

Software with Business Sense

Incident Management

Streamline incident reporting, investigation, and resolution with a comprehensive incident management module. This functionality helps organizations respond swiftly and learn from every incident to prevent recurrence.

Key Features

- Incident Logging
- Root Cause Analysis (RCA)
- Corrective & Preventive Actions (CAPA)
- Regulatory Reporting
- Integrations with Other Modules
- Realtime Dashboards

Benefits of EHS Solutions

- By integrating these functionalities into a unified EHS platform, organizations can:

Enhance Operational Safety and Compliance

Reduce Manual Efforts and Increase Process Efficiency

Foster a Proactive Safety Culture

Gain Actionable Insights through Advanced Analytics

Improve Stakeholders' Trust with transparent Safety Processes

Achieve Sustainability Goals

Hiring Us

Several Good Reasons

SVIQ

Software with Business Sense

Why Choose Us

- Benefits of Engaging with SVIQ
  - Client-centric, Ethical Demeanour
  - Cross-industry Expertise
  - Uncompromised Quality
  - Continuous Innovation
  - Proactive Support, Consultative Approach
  - SLA Based, Timely Response and Resolutions
  - Transparent Communication
  - Flexibility for an Enduring, Lasting Partnership

WHY CHOOSE US?

SVIQ

Software with Business Sense

The SVIQ Senior Management

Suntosh Mankodi

Co-Founder and Principal
Solutions Consultant

Abhishek Dave

Co-Founder and Head of
Business Development

Omprakash Dhanurkar

Head – System Design
and Development

Dhiraj Sakore

Head – Implementation
