Introduction

Our Purpose and Strength

Software with Business Sense

Introduction

- SVIQ eBMR streamlines manufacturing for chemical and pharmaceutical companies by digitalizing processes and ensuring real-time data management.
- It enhances data integrity, operational efficiency, and regulatory compliance while providing complete visibility and traceability of batch activities.
- Achieve superior product quality, consistency, and compliance with SVIQ Solutions eBMR.

Our Purpose

Vision

Become a Globally Renowned, Prestigious organization

- for Business Process Digitalization Success
- across Industry Verticals
- with effective Process Automation
- and Collaboration Platforms as well as Managed Services.

Mission

Develop and Provide Global Industry with –

- Highly Dependable Technology Platforms for Process Digitalization, Automation and Optimization of Organizational and Management Resources for Best Outcomes across Industry Verticals Globally
- Provide Highly Efficient Managed Services and Team Resources for Business Processes to Deliver Optimum Value

Values

We swear by and always attach great importance to Honesty, Integrity, Empathy, Equal Opportunity, Camaraderie, Sharing, Unity of Purpose, High Standards of Quality and Service.

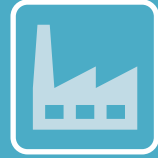

Industries

Global Industry Verticals
We Service

Software with Business Sense

Wide Expanse of Key Industries

Manufacturing – Discrete and Process

Chemicals, API and Pharmaceuticals

Engineering

Automobile and Ancillary

Food and Beverages

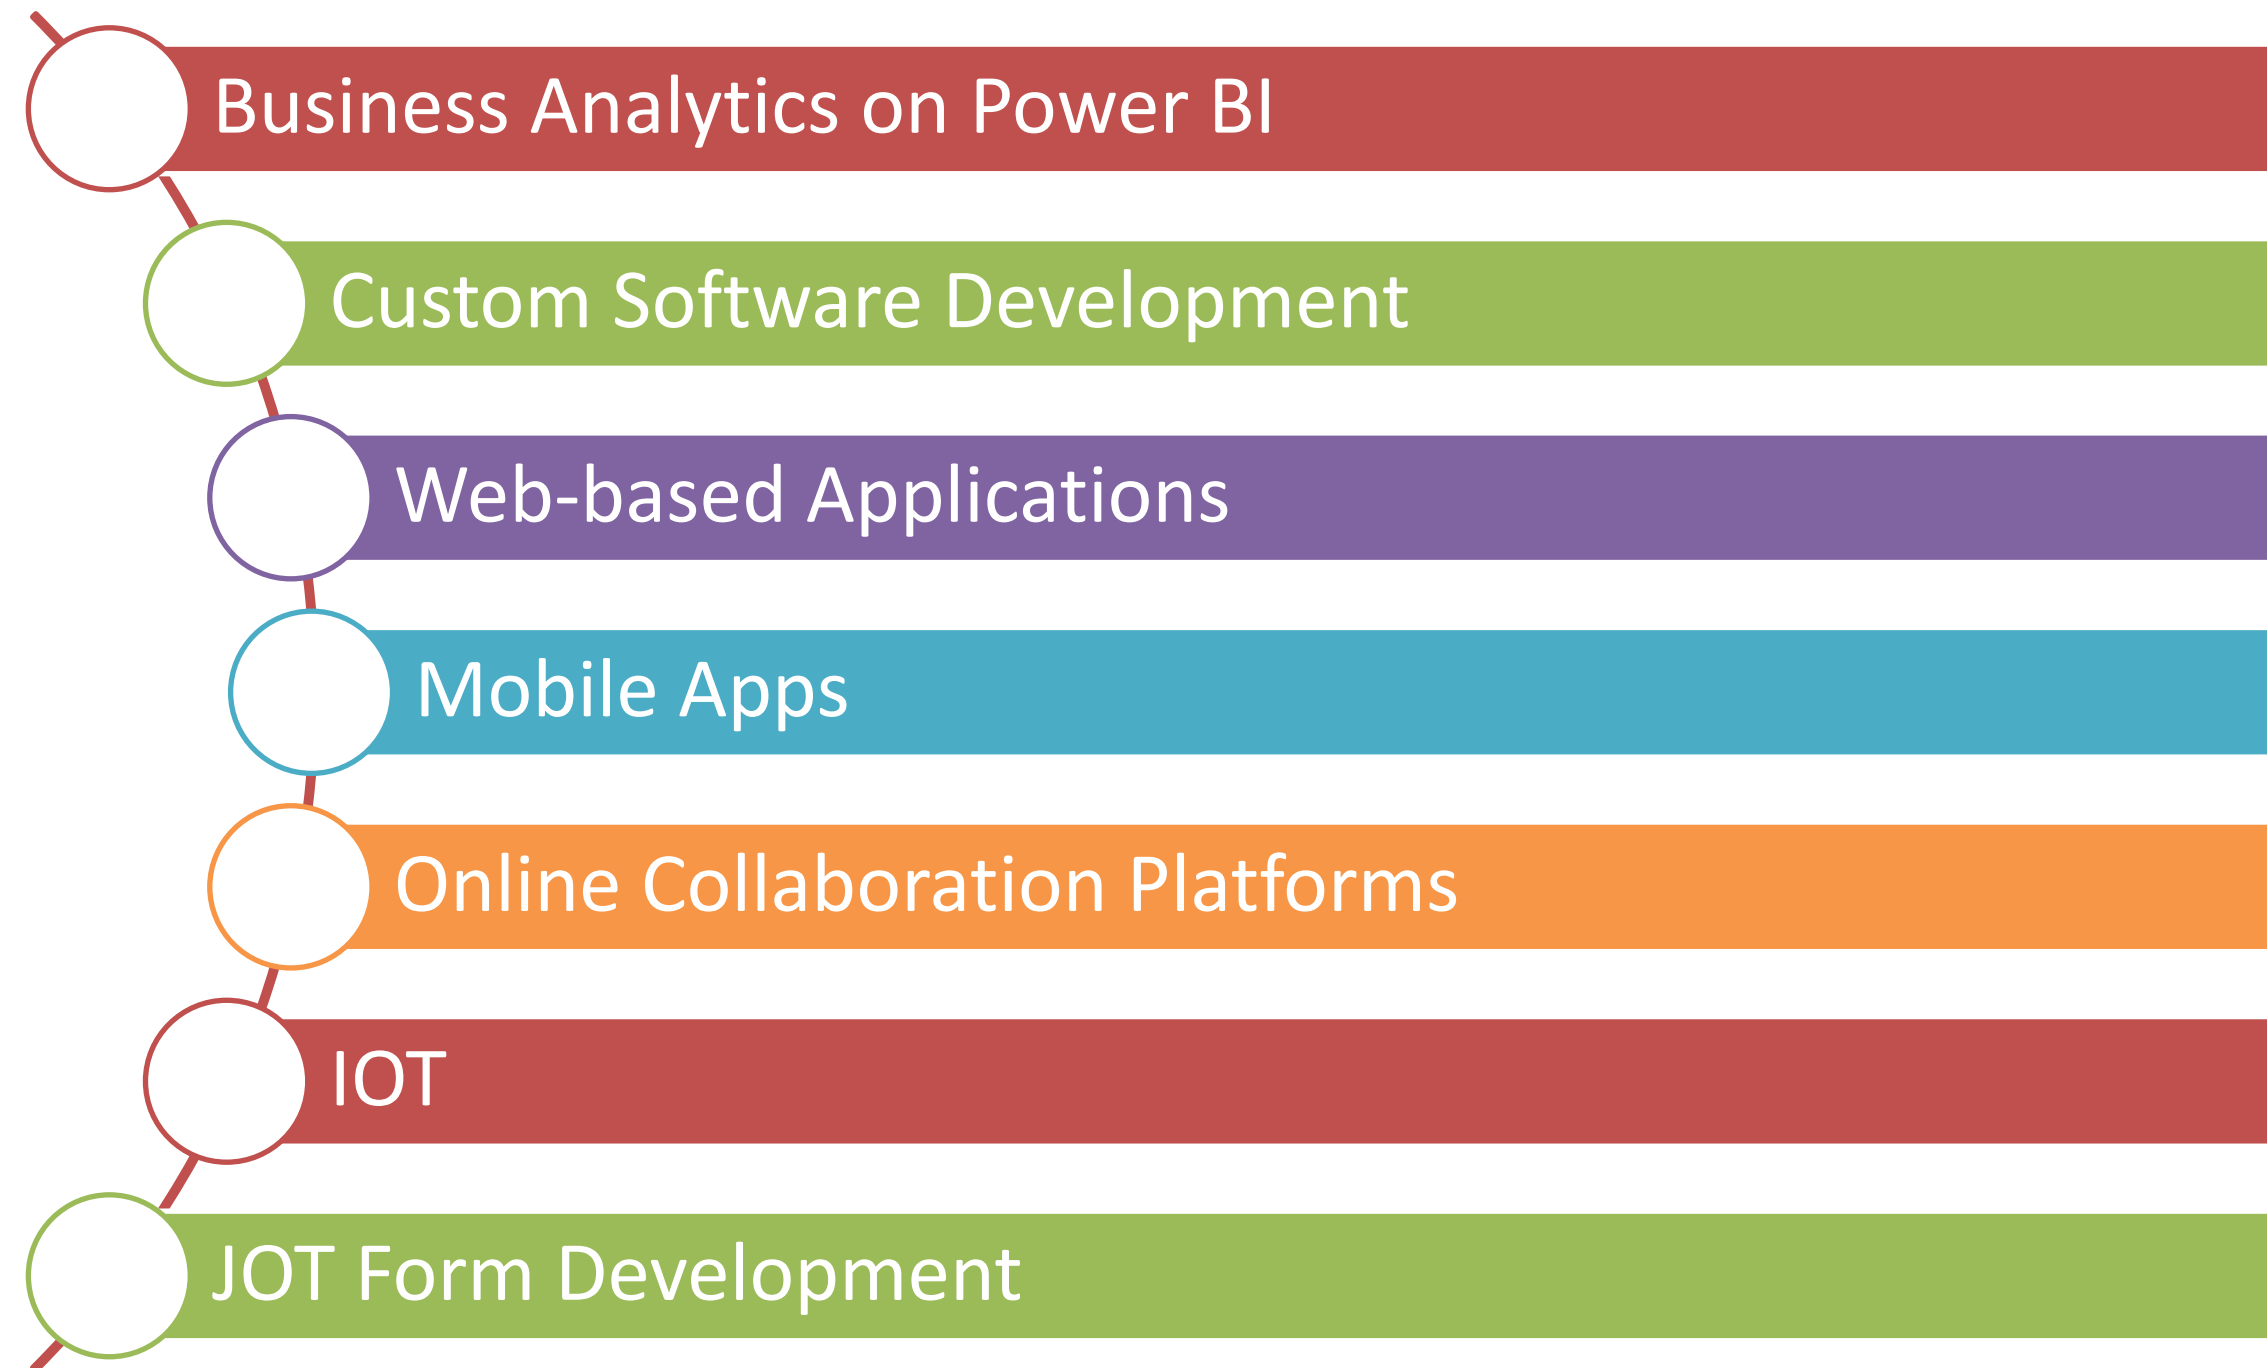

Construction and Infrastructure

Logistics and a Many Others

Solutions and Services

**Comprehensive
Services to enable
Business Growth**

DETAILS OF eBMR SOFTWARE FUNCTIONALITIES

eBMR – Part of the SVIQ OpMan Suite

eBMR

- A Flexible Template-based Electronic Batch Manufacturing Process Management software
- Recording any Multi-stage Production Cycles with In-Process Observations, Activity, Readings and Quality Check Points
- Designed versatile for application in any industry vertical

EHS

- Created to digitalize all Processes in the Governance of Environment, Health and Safety Operations of any industry sector
- Covers PTW, PSSR, PSM, Incident Management, Observations and Change Management processes

AMS

- Aids creation of Scheduled and Ad-hoc Audit Plans
- Helps track Multiple Audit Calendars and carry out Audits, record and share Observations and Checklists for Confirmity and Compliance tracking

VizTrack

- Complete Visitor Management System to track both Internal and External Visitors
- Maintains Head Count at Plant comprising both employees and visitors to enable aid in emergency evacuations
- Keeps updated location-wise Emergency Response Team members' availability by tracking their entry/exit from each location

LCM – Coming Up

- Plan Labour Requirements, Award Contracts
- Manage Labour allotment to multiple sites
- Oversee Labour Attendance
- Ensure all Labour related Compliances

CMS – Coming Up

- A versatile Canteen Management System that aids accurate planning of food production across shifts aided by current attendance of employees, workers and visitors
- Enables reduction of food wastage and helps maintain sustainable canteen operations

Functionalities of SVIQ eBMR

Complete Coverage of All Relevant Aspects

- Template-based, Product-wise Dynamic eBMR Form Creation
- Supports Multi-stage Production Processes
- Version Management to conform with latest Recipe Release / Production SOPs
- Automated Time-point Reading Alerts
- End-of-Operation/Phase IP QC Management
- Basic and Deviation Approval Workflows
- Convergence with Incident Management, Observations, PTW modules
- Seamlessly Integrable with SCADA systems and any ERP

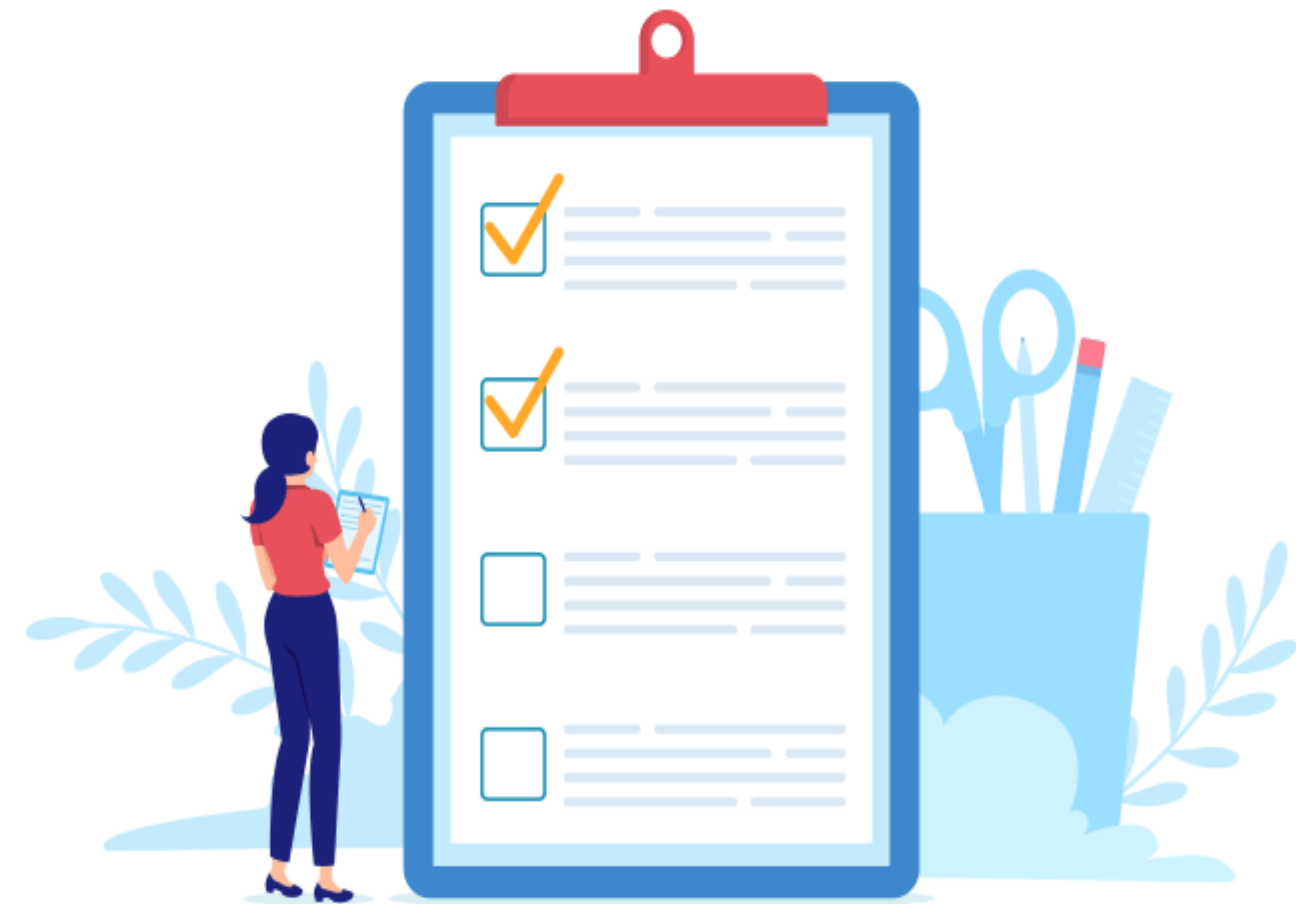

Operations/Phase-wise Task Lists

This feature streamlines planning and execution of batch-related activities, ensuring accountability and operational efficiency.

Key Features

- Dynamic Task Assignment
- Step By Step Guidance
- Real Time Progress Monitoring
- Automated Alerts
- Integrated Compliance Checks
- Mobile Access, Tablet-based Operations

Batch Manufacturing

This module digitizes the batch manufacturing process, eliminating manual errors and ensuring compliance.

Key Features

- Pre-Batch Preparation
- Real Time Data Capture – Manual, SCADA, Photo Uploads
- Deviation Alerts
- Material Consumption Tracking
- Integrated In-Process Quality Checks
- Digital Batch Records

Approval Workflows

This functionality ensures that every batch adheres to rigorous quality and compliance standards before release.

Key Features

- Role Based Approvals
- Configurable Work Flow Design
- Automated Notifications
- Electronic Signatures
- Real Time Visibility
- Audit Trails

Integration with SAP

Seamless integration with SAP enhances productivity by ensuring the eBMR system and SAP work as a unified ecosystem.

Key Features Include

- Data Synchronization
- Material Resource Planning
- Production Order Execution
- Quality Control Integration
- Regulatory Compliance Reporting
- Enhanced Decision-Making

Benefits of eBMR Solutions

- Organizations implementing eBMR solutions gain.

Enhanced Accuracy

Regulatory Compliance

Improved Efficiency

Cost Savings

Scalability

End-to-End Traceability

Hiring Us

Several Good Reasons

Software with Business Sense

Why Choose Us

- Benefits of Engaging with SVIQ
 - Client-centric, Ethical Demeanour
 - Cross-industry Expertise
 - Uncompromised Quality
 - Continuous Innovation
 - Proactive Support, Consultative Approach
 - SLA Based, Timely Response and Resolutions
 - Transparent Communication
 - Flexibility for an Enduring, Lasting Partnership
